

CR-5 PRO

DELIVER INDUSTRIAL ACCURACY ON YOUR DESKTOP

All metal chamber body | Reliable single extrusion | Versatile in multi-materials

INDUSTRIAL 3D PRINTER

Create Reality Achieve Dreams

Product parameters

Print size	300*225*380mm	Slicer software	Creality Slicer/Cura/Repetier-Host/Simplify3D
Machine size	530*487*612mm	Nozzle amount	1
Package size	625*545*710mm	Nozzle diameter	0.4mm
Machine weight	32.5kg	Print mode	Online/SD card
Net weight	38.8kg	Software language	Chinese/English
Nominal voltage	115/230V	File format	STL/OBJ/AMF
Output voltage	24V	Motherboard	Silent motherboard
Nominal power	350W	Print speed	50-80mm/s
Filaments	PLA/ABS	UI interface	4.3in touch screen

Product advantages

Exquisite design
Ivory white chamber+ Transparent blue Acrylic door

Stable sheet metal chamber
Integrated all metal machine body, stable structure for high precision

Large print size
300*225*380mm for greater creativity

Control chip
ATMEGA2560 control chip for high speed and high precision printing

MeanWell power supply
High quality 24V/350W MeanWell power supply

Carborundum glass platform
Better bed adhesion and smoother first layer

Filament sensor
No worries on filament runout and breakage, higher printing success ration

Resume printing function
Resume printing from where it stops

Upgraded nozzle structure
Well designed nozzle structure and strong cooling fan
