DESCRIPTION

PLA Crystal is an innovative filament series tailored for 3D printing enthusiasts seeking transparent and semi-transparent effects. Crafted from highly crystalline PLA, these filaments offer exceptional clarity and aesthetics, setting them apart from traditional non-transparent PLA. With nearly 30% improved flow rates, they enable smoother and more precise 3D printing.

FEAUTURES

- transparent, crystalline prints
- increased flow rate
- · easy printing
- · made of biodegradable raw materials

STORAGE AND SHELF LIFE

Filament should be stored in a dry room at room temperature. Recommended storage temperature is ca. 18-25°C (64.4-77.0°F). Keep out of moisture, sunlight and direct heat. When stored properly, product has a shelf life of 24 months.
